

# Our Management Principles

- Avoid unilateral decisions. Each of us is an important contributor. Share ideas, communicate thoughts, collaborate & be creative.
- Think about who else will be impacted, involve them, and get their input.
- Use the WOLFPACK concept for decision making.
- See things first-hand so you understand.
- Ask questions, talk to each other, share ideas & learn together.
- Get it right the first time. Ready, Aim, Fire . . . not ready, fire, aim.
- Operate efficiently, have cost-effective quality & run a tight ship.
- Strive for continuous improvement & forward progress.
- Be on the cutting edge, not the bleeding edge. Let's lead, but not be the guinea pig.
